1. Basic Views

Based on our corporate philosophy, which is “Contributing to the creation of a vital society and a healthy lifestyle through our fermentation technology and biotechnology in a way that achieves harmony with nature,” the Company and the Takara Group (hereinafter the “Group”) benefits society by unlocking new potential in the culinary, lifestyle, and life science fields through our fermentation technologies for traditional Japanese sake and our cutting-edge innovation in biotechnologies and by continuing to create new value.

The Company has established a long-term management plan, “TaKaRa Group Challenge for the 100th,” which will end in the fiscal year ending March 31, 2026, the 100th anniversary of the Group’s foundation. Under this plan, we have established the Group’s vision* as well as management and business strategies to achieve this vision.

The Company believes that achieving this vision will lead to the achievement of continuous growth and an increase in corporate value of the Group over the medium- to long-term and that the effective and efficient achievement of this vision requires a corporate governance structure that provides transparent, fair, timely, and resolute decision-making. At the same time, we also believe that to remain a trusted corporate group, we need to have in place a structure that respects the perspectives of stakeholders, including shareholders, customers, employees, creditors, and local communities, as well as enables appropriate communication.

The Company shall establish a corporate governance structure based on the above stance to achieve continuous growth and an increase in corporate value of the Group over the medium- to long-term, and is making efforts in accordance with the specific policies set forth in the Takara Holdings Corporate Governance Policy, which is posted on the Company’s website.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

(Supplementary Principle 4.1.3 and Supplementary Principles 4.3.2 and 4.3.3 Succession Planning/The Procedures for Appointment/Dismissal of the CEO)

Descriptions are based on the Code as revised in June 2021.

The Company recognizes that the establishment of a process for the election of the CEO, etc. and the development of the next generation of the senior management (a succession plan) is a significant issue for the achievement of continuous growth and an increase in corporate value over the medium- to long-term. At present, the Company provides training programs as part of its plan for the development of the next generation of the senior management. Going forward, in addition to enhancing these programs, the Company shall comprehensively examine the formulation of requirements and development policies for the CEO, etc., appointment and dismissal procedures, and the system for supervision thereof by the Board of Directors in light of the business environment and corporate culture of the Company.

(Principle 4.2 Roles and Responsibilities of the Board of Directors (2) and Supplementary Principle 4.2.1 Share-Based Compensation System)

At the Company, important matters for corporate management shall be fully discussed at various committees comprised of directors and Audit & Supervisory Board members, including external directors, and operating officers. Based on the discussion, the matters shall be resolved at the Board of Directors or decided by the senior management ultimately.

Upon delegation by a resolution of the Board of Directors, following deliberation by the Nomination and Compensation Committee, the President shall determine the amount of compensation for directors of the Company. The amount is determined based on the Rules for Compensation of Officers approved by the Board of Directors within the range of the ceiling on the total amount of compensation approved by the general shareholders' meeting. Any revision to the provisions of the Rules for Compensation of Officers concerning directors shall require a resolution of the Board of Directors.

Compensation for executive directors of the Company consists of fixed compensation based on positions and roles and performance-based compensation for the purpose of strengthening incentives. Compensation for external directors consists solely of fixed compensation, considering their roles.

Fixed compensation for directors of the Company shall be paid at a fixed time every month, and the amount shall be determined based on positions and roles by comprehensively taking into consideration the business performance of the Company, economic conditions, and other factors.

Performance-based compensation for executive directors of the Company shall be paid at a fixed time every month, and the amount shall be determined based on the amount of performance-based compensation paid in the previous fiscal year and the individual's performance evaluation score for the previous fiscal year. The main indicator used for calculating performance evaluation scores for the previous fiscal year is consolidated operating income, which the Company considers as the most important management indicator.

The amount of compensation for each executive director of the Company is determined so that the ratio between the amount of fixed compensation and the standard amount of performance-based compensation will be 1:1 for all positions in principle.

The President, to whom the authority to determine the amount of compensation for directors of the Company is delegated by a resolution of the Board of Directors, shall be authorized to determine the amounts of fixed compensation and performance-based compensation for each director in accordance with this Policy. To ensure that such authority is exercised appropriately by the President, such decisions by the President shall be made through deliberations by the Nomination and Compensation Committee.

The Company currently has not adopted any compensation system that is linked to medium- to long-term business results or based on shares. However, the Company recognizes that a system of incentives for directors aimed at sustainable growth is a significant management issue, and will continue to comprehensively consider establishment of such systems, including the method for determining compensation as a whole.

(Supplementary Principle 4.11.1 Policy on the Balance between Knowledge, Experience and Skills of the Board of Directors as a Whole, and Also on Diversity and Appropriate Board Size)

The Company believes that the roles and responsibilities of the Board of Directors are extremely important for the achievement of continuous growth and to increase corporate value over the medium- to long-term and that it is extremely important to continuously examine the composition of the Board of Directors for the continuous improvement in its effectiveness. The Company will continue to examine according to the business environment and business characteristics, etc. including the appointment of persons with management experience at other companies as independent external directors.

(Principle 1.4 Cross-Shareholdings)

In our Group, the Company and Group companies may strategically hold shares of the companies that have business relationships with individual companies in the Group. Such strategic holding of shares shall be implemented only if the Board of Directors of the Group company intending to purchase said shares acknowledges that the shareholding is reasonable as a means of business alliance, maintenance and enhancement of transaction, etc., and in view of the benefits and risks. With regard to the individual shareholdings, the Board of Directors of the Company shall annually judge whether to continue to hold shares through the examination in terms of the contribution to the achievement of continuous growth of the Group and an increase in its corporate value over the medium- to long-term, and disclose the results of its judgement. For shareholdings acknowledged to have no economic rationale, cross-shareholdings shall be reduced through sale in a timely manner upon consultation with the company in question. Meanwhile, on being informed by a company that holds cross-shareholdings of the Company's shares (the shareholder of cross-held shares) that the company in question intends to sell the Company's shares, the Company shall respect the said intention. With respect to exercising the voting rights of the companies in which shares are held, each Group company shall, based on the examination of all proposals, in principle, judge comprehensively whether or not the proposal contributes to the achievement of continuous growth of the Group and an increase in its corporate value over the medium- to long-term and the shareholders' common interest of the Group and the invested company so as to exercise them appropriately. This includes opposing proposals in cases when earnings have been poor for a certain period, when it is acknowledged that management strategy or financial strategy will damage shareholder interests, when illegal or anti-social acts are acknowledged, and other similar cases. The results of the examination concerning whether to hold cross-shareholdings are disclosed on the Company's website under "Corporate Governance," etc.

(Principle 1.7 Related Party Transactions)

The Company shall request annually each of its officers to submit a written confirmation of transactions between the related-parties of the Company in order to identify the existence of the transactions with officers or their relatives, or with companies in which those officers or their relatives hold a majority of the voting rights or serve as a representative. In addition, the Company shall regularly monitor the status of investment management by the asset manager and conduct reviews as necessary. [Measures for a management approach that is conscious of cost of capital and stock prices]

In the Group's Medium-Term Management Plan for 2025, which is effective from the fiscal year ended March 31, 2024, we have set a management policy of "ensuring ROIC-driven corporate management is practiced across the Group and investing in business in growth and high-priority fields." Based on this plan, we will invest approximately 88.0 billion yen—exceeding our operating cashflow—mainly in growth and high-priority fields over three years, and aim to post an ROE of 9.0% or more and an ROIC of 7.5% or more for the fiscal year ending March 31, 2026.

In the fiscal year ended March 31, 2024, which is the first year of the Medium-Term Management Plan for 2025, we invested 27.0 billion yen mainly in business in growth and high-priority fields in line with the policy. On the other hand, net sales and profits declined mainly due to a large decrease in sales of COVID-19 related testing reagents, while net assets increased due to increases in valuation difference on available-for-sale securities and foreign currency translation adjustment. As a result, ROE was 7.5% and ROIC was 4.8%, both below those for the fiscal year ended March 31, 2023. ROIC was lower than the Group's WACC which is regarded to be slightly more than 6%. PBR also stayed at around 1X, and therefore we believe that activities for increasing corporate value need to be further strengthened.

In light of these circumstances, the Group aims to shift to an upward trend in earnings for achieving the target ROE and ROIC in the Medium-Term Management Plan for 2025, as well as further promotes initiatives for increasing capital efficiency, such as investing in business in growth and high-priority fields carefully selected by evaluation with the Net Present Value (NPV) method or other methods and reducing cross-shareholdings. In addition, we will accelerate penetration of the ROIC management by adding the degree of achievement of the target ROIC to the performance evaluation indicators for the officers in the positions of heads of workplaces or higher from the fiscal year ending March 31, 2025. Furthermore, we will make efforts to promote the understanding of the Group among respective stakeholders, including investors, by providing more information as a corporate entity.

The details of the business strategies for the fiscal year ending March 31, 2025 are published in IR Events under INVESTOR RELATION of our website, titled Briefing Session for Financial Statements for the Fiscal Year Ended March 31, 2024. (Takara Holdings Inc. "IR Events"

Takara Bio is positioned as the subsidiary specializing in life science to promote the Biomedical Business for the Group. Takara Bio is not a competitor of any other segment in the Group and has only limited dealings with the Company.

[The significance of having a listed subsidiary and measures to ensure the effectiveness of the governance system of the listed subsidiary in light of the views and policies concerning the Group's management]

<Views and policies concerning the Group's management>

- Based on our corporate philosophy, which is "Contributing to the creation of a vital society and a healthy lifestyle through our fermentation technology and biotechnology in a way that achieves harmony with nature," the Company and the Group benefits society by unlocking new potential in the culinary, lifestyle, and life science fields through our fermentation technologies for traditional Japanese sake and our cutting-edge innovation in biotechnologies and by continuing to create new value.
- The Company believes that achieving the vision in the long-term management plan, "TaKaRa Group Challenge for the 100th," which will end in the fiscal year ending March 31, 2026, the 100th anniversary of the Group's foundation will lead to an increase in corporate value of the Group as a whole.
- To achieve the vision, the Company's basic approach is to respect the independence of each Group company, and have each company increase the speed of its management through independent management and pursue business outcomes to the utmost extent. The Company also believes it is important to integrate the business plans of each company for the overall optimization of the Group and to decide on the effective allocation of management resources such as funds and personnel by continuously identifying and analyzing the status of business execution.
- This is a system that consolidates management resources and aims for growth in three business segments: Takara Shuzo, which handles our domestic business, Takara Shuzo International Group, which handles our international business, and Takara Bio Group, which handles our Biomedical Business. We have clarified the division of roles between the business companies that give undivided attention to promoting above businesses and the Company, which strongly supports the business of each company and leads the overall management of the Group.

<Significance of having a listed subsidiary>

- Takara Bio is a growing enterprise of great promise in the Group. We believe that having Takara Bio in our business portfolio is extremely important for maximizing the Group's corporate value in the future.
- We also believe that Takara Bio needs to have its own means of financing in order to further accelerate growth of our Biomedical Business. Moreover, to hire and train talented employees and further advance the management of Takara Bio, we believe it is vital to maintain Takara Bio as a listed subsidiary.

<Measures to ensure the effectiveness of the governance system of the listed subsidiary>

- The Takara Bio Corporate Governance Policy stipulates that one-third or more of directors at Takara Bio (three out of nine as of the date this report is filed) must be independent external directors with no vested interest in Takara Bio or the Company. Hence, we believe that we have a system in place for protecting the rights of Takara Bio's general shareholders and ensuring independent decision-making. Furthermore, three of the five Audit & Supervisory Board members at Takara Bio are independent external Audit & Supervisory Board members.
- In addition, for the purpose of protecting the interests of Takara Bio's minority shareholders, Takara Bio deliberates and considers matters related to important transactions and acts in which the interests of the Company or its subsidiaries conflict with the interests of Takara Bio's minority shareholders, in a special committee composed of three or more independent members, including external directors. Takara Bio advises and recommends the results to the Board of Directors of Takara Bio.
- The Company has established the Rules and Regulations for Overseeing Group Companies from the viewpoint of consolidated business administration. The objective of these Rules and Regulations is to ensure that our Group companies maintain their uniqueness and autonomy while the corporate value of the overall Group is maximized. In the said Rules and Regulations, the Group companies are classified according to their attributes, including capital relationships. Although we apply the said Rules and Regulations to Takara Bio, the Company does not require preliminary discussions or prior approval on material matters, including the matters to be resolved at the Board of Directors, and provides for reporting only, based on the classification of the Rules and Regulations. Hence, Takara Bio runs its business independently.
- Mutsumi Kimura, the Representative Director and President of the Company, concurrently serves as a director of Takara Bio. He was, however, invited by Takara Bio based on the judgment that his experience and knowledge gained through his management of Takara Bio in the past would be useful to Takara Bio and not for the purpose of the Company controlling Takara Bio. Furthermore, in receiving the proposal of agenda items for the appointment of corporate executives of Takara Bio, the Company does not engage in the nomination process in advance.
